

SPINAL ANALYSIS

For the Detection and Correction of Spine Related Problems

CHRONIC NECK AND BACK PAIN I'm too young

to be living with chronic back pain so my primary care physician sent me to Weldon Spring Clinic and the Spine Rehabilitation Institute of Missouri for a **Spinal Analysis**. After the first recommended series of treatments I was feeling at least 80% better. My pain went from SEVERE to MILD. What a difference. MH age 20. My medical doctor also gets treatment at Weldon Spring Clinic

SCOLIOSIS After my doctor wanted to watch and wait to see if my scoliosis was going to get worse my mom found out about the **Spinal Analysis**. It showed where my spine was unbalanced and where it could be corrected. I don't want surgery or my scoliosis to get worse. I really like my treatment and doctor at Weldon Spring Clinic. CO

SPORTS ENHANCEMENT I was interested in achieving a higher level of sports performance to improve my chances for a college scholarship so my sports medicine doctor sent me for a **Spinal Analysis**. The analysis identified a number of spine related issues that were compromising my ability to compete at a higher level. Now I'm consistently playing without injury JP age 15. My doctor gets treatment at Weldon Spring Clinic

POST SURGICAL SCIATICA I wish I knew about this before the surgery. Following surgery I was still getting injections in my back for pain management. Then my chiropractor sent me for a **Spinal Analysis** and treatment at Weldon Spring Clinic. I could tell a big difference in just a few treatments LF age 72. In fact my chiropractic doctor gets treatment at Weldon Spring Clinic

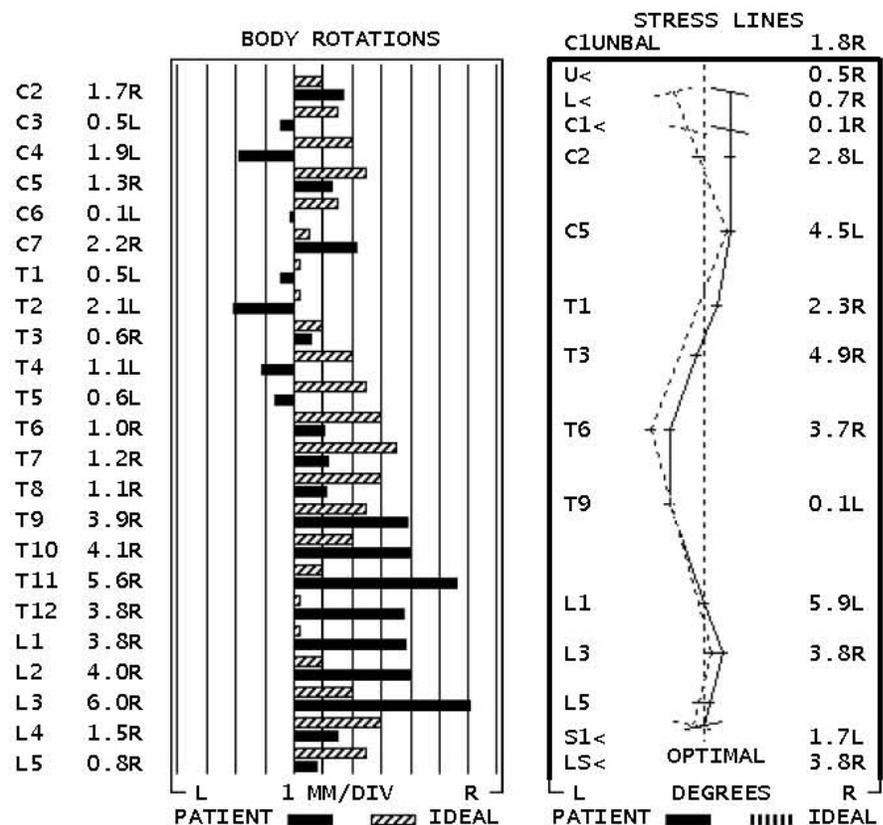

What is the Spinal Analysis?

This patented system represents 30 years of software programming, data collection and research. The Spinal Analysis is the only engineering program that performs a comprehensive assessment of the structural organization and function of your spine and pelvis. Using ordinary x-rays the program can detect old injuries that healed improperly resulting in spinal distortion, joint misalignment, diminished function, pain and finally degeneration.

How can a Spinal Analysis Help You

The program performs over 500 measurements and produces a blueprint of your spine. It shows the actual position of each vertebra and then shows the location of the vertebra's correct position. With this information the doctors at Weldon Spring Clinic design a specific treatment program to rehabilitate your spine. The majority of patients report 90% improvement.
